Subject: Per mile costs

In general, the capital cost of MST is about \$40,000 per mile, less this particular year (about \$33,000) due to lower bids from the bad economy.

A mile of collector highway improvement costs about \$750,000 to \$ 1 million.

A mile of full arterial reconstruction costs for \$2 – 4 million, even more in urban areas.

I hope this helps. Anything more specific requires specific facts – location, purpose and need of projects, etc.
